SUMMARY

Versatile software engineer specialized in Full-Stack Development focusing on JavaScript, Typescript, Node.js, React.js, Angular, Python, MySQL and MongoDB. Specializing in building secure web applications with seamless client-server communication. Prioritizing code quality and reliability, I thrive in collaborative environments and drive innovation to meet project deadlines.

EXPERIENCE

Eternalight Infotech

Software Engineer

02/2024 – Present

Pune, India | Remote

- Contributing to a fintech project named FamO, which is for families who own multiple companies and investments, which facilitates the management of all kinds of family funds, assets, and cash details in one place.
- Developing server-side solutions and managing seamless communication with the client by complete authentication and authorisation.
- Contributing to the feature and API development for cross-functionality to deliver high-quality solutions within project timelines ensuring code quality, reliability, and security through code reviews, testing, and debugging.
- Implementing features including onboard family, uploading companies, Discussions, real-time messaging and push notifications, and contributing to database schema design utilizing JavaScript/Typescript, Node.js/Nest.js, Express.js and PostgreSQL with TypeOrm.

SpringML Inc.

Cloud Engineer

07/2022 – 11/2023

Hyderabad, India | Remote

- Contributed to vehicle crash analytics, MGIC-DocAI, and security assessment tools, developing features new with JavaScript, MySQL, Angular, Python Flask, and GCP, and designed interactive dashboards using Looker and Looker Studio.
- Collaborated with teams to streamline cloud deployments, utilizing services like Cloud Run, App Engine, Compute Engine, BigQuery, Cloud Storage etc.

INTERNSHIPS

iLink Digital

Consultant

01/2022 – 03/2022

Pune, India | Remote

- Designed analytical and interactive Dashboards on Grafana using PostgreSQL and Elasticsearch.
- Contributed to full-stack development focusing on designing APIs using Python, Django and Flask.

Jivrus Technologies

Software Developer

05/2021 – 10/2021

Bangalore, India | Remote

- Contribute to the Development of various full-stack web applications including Form Presenter and Map My Sheets focusing on JavaScript, Angular, Angular Material and Node.js
- Designed interactive and fully responsive UI features, optimized the code into reusable components and fixed bugs

EDUCATION

National Institute of Technology (NIT), Andhra Pradesh

Bachelor of Technology in Computer Science and Engineering

08/2018 – 06/2022

Tadepalligudem, India

- **Projects:** Department Management System Hotel Booking System E-School Management Student Portal

TECHNICAL SKILLS

HTML CSS JavaScript Typescript Python Node.js Express.js Angular React.js Flask MySQL MongoDB
PostgreSQL JSON REST API Bootstrap Material UI Google Cloud Platform Git Data Structures & Algorithms
Object-Oriented Programming Operating Systems Leadership Teamwork Time Management Problem-Solving
