Portfolio

#### **SUMMARY**

I am a dynamic Software Engineer with a B.Tech in Computer Science from NIT Andhra Pradesh. Experienced in full-stack development and cloud deployment, my projects include Vehicle Crash Analytics and MGIC DocAI for invoice analysis. Proficient in HTML5, CSS3, JavaScript, Angular, Python, Node.js, MongoDB, and more. Strong soft skills in time management and analytical reasoning. Seeking a challenging role to contribute my skills and drive innovation in a dynamic software engineering environment.

## **EDUCATION**

B.Tech National Institute of Technology (NIT), Andhra Pradesh

08/2018 - 06/2022

A 4-year full-time degree program in Computer Science and Engineering

#### **EXPERIENCE**

SpringML Associate Cloud Engineer

07/2022 - 11/2023

Proficiently utilized a diverse tech stack including JavaScript, Angular, MySQL, Node.js, MongoDB, Python, Flask, and Google Cloud services.

Davalanad full stack applications like MCIC Da

Developed full-stack applications like MGIC DocAl for invoice analysis, Vehicle-Crash Analytics, and Security Assessment tools for permission management.

Collaborated with teams to streamline cloud deployments, utilizing services like Google Cloud Run, App Engine, Compute Engine, BigQuery, and Cloud Storage.

**iLink Digital** Pune Consultant (Internship)

01/2022 - 04/2022

Worked on analytical and interactive visualisation web application on Grafana using PostgreSQL and ElasticSearch

Developed and integrated APIs using Python frameworks like Django and Flask.

Jivrus Technologies Bangalore Software Developer (Internship)

05/2021 - 11/2021

Developed web applications utilising JavaScript, Node.js, and Angular.

Managed bug fixing and new feature implementation.

### **PROJECTS**

# **Vehicle Crash Analytics**

 ${\bf Angular, Java Script, Flask, My SQL, Google\ Cloud}$ 

Web app for state agencies to manage crash data, analyse patterns, and enhance safety measures.

# **Form Presenter**

Angular, JavaScript, Node.js, MongoDB, Material UI

Form Presenter is used for online quizzes, exams, tests, and assessments with the help of time, action, audience, and presentation controls.

# **Department Management System**

Angular, JavaScript, Node.Js, MongoDB

Streamline department operations with the modern solution, utilising Angular, Node.js, MongoDB, and Git for efficient workflow management.

Student Portal Angular, JavaScript, Node.js, MySQL

A student portal is a web application that allows students to check their marks, attendance, results, and performance information in one place.

#### **Portfolio**

Angular, JavaScript, Node.Js, MongoDB

A portfolio project showcases your best work, skills, and achievements in one place, offering a clear view of your capabilities and experiences to others.

## **SKILLS**

Web HTML5, CSS3, DOM, JSON, REST API, Bootstrap, Material UI

**Programming** JavaScript, Typescript, Python

Frameworks Node.js, Express.js, Angular, React.js, Flask

Databases MySQL, MongoDB, PostgreSQL

**Concepts** Data Structures and Algorithms, OOP, Operating Systems

Soft-Skills Time Management, Leadership, Teamwork, Analytical Reasoning, Problem-Solving

Tools Git Version Control, Google Cloud Platform, VS Code, MySQL Workbench, MongoDB Compass
