India Open to relocation · Visa sponsorship welcome · Remote / Hybrid / On-site

## Professional Summary

Backend-focused Software Engineer with 3+ years of production experience building and scaling microservices, REST APIs, and AI/LLM-powered data pipelines across FinTech, analytics, and SaaS platforms. Expert in **Node.js (NestJS)**, **TypeScript**, and **Python**; hands-on with Go in distributed systems. Delivered cloud-native solutions on **GCP** and **AWS** using Kubernetes, Docker, Redis, Kafka, and RabbitMQ. Holder of Google Cloud ACE + PDE and GitHub Copilot certifications. Known for end-to-end feature ownership, measurable accuracy improvements (95%+), and shipping secure, maintainable code with clear business impact.

## Technical Skills

Languages: *JavaScript, TypeScript, Python, Go, Java*  
Backend: *Node.js, Express.js, NestJS, Fastify, Microservices, REST APIs, GraphQL, WebSockets, Flask, Gin*  
Frontend: *React.js, Angular, HTML5, CSS3*  
Databases: *PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, SQLite*  
Cloud/DevOps: *GCP, AWS, Docker, Kubernetes (K8s), CI/CD, Looker*  
Messaging: *RabbitMQ, Kafka, Socket.IO*  
AI / LLM: *OpenAI API, AWS Textract, Vertex AI, GitHub Copilot, Cursor*  
Testing: *Jest, Supertest, pytest, unittest, Integration Testing*

## Certifications

Google Cloud Certified – **Associate Cloud Engineer** · Google Cloud Certified – **Professional Data Engineer** · **GitHub Copilot Certified Professional**

## Professional Experience

### Software Engineer

*Talentica Software*

Remote, Pune · Nov 2024 – Present

**Client: Mist Systems (Juniper Networks / HPE)** *Python · pytest · Go · Docker · Kafka · K8s · Cursor · GitHub Copilot*

- Architected automated unit test suites across 10+ Python and Go microservice repositories (REST APIs, Kafka consumers, Zookeeper, AWS Lambda, Kubernetes operations), raising baseline coverage from near-zero to regression-safe levels across distributed services.
- Reduced repetitive test-authoring time by ~40% using Cursor and GitHub Copilot for scaffolding and parametrization, while maintaining manual review of all edge cases and API contracts.

**Client: Triller — Julius Influencer Marketing Platform** *TypeScript · NestJS · GraphQL · Redis · RabbitMQ · Elasticsearch · AWS · Phyllo API*

- Built Instagram Stories ingestion pipeline via Phyllo API in a dedicated NestJS microservice, replacing brittle scrapers with a reliable integration normalizing reach and impressions across 3 social platforms.
- Enhanced GraphQL reporting service with Prometheus instrumentation, new schema fields, and deliverable traceability; resolved production data-integrity issues through feature flags and CRON backfill logic.

### Software Engineer

*Eternalight Infotech*

Remote, Pune · Feb 2024 – Nov 2024

**FamO — FinTech Platform & AI Document Parser** *NestJS · PostgreSQL · Firebase · Python · AWS Textract · OpenAI*

- Designed and built an LLM-powered contract note parser (Python, Flask, AWS Textract, OpenAI) achieving 95%+ extraction accuracy across varied broker PDF formats, eliminating over 90% of manual back-office data entry.
- Developed core FinTech backend features — family onboarding, real-time portfolio valuation, P&L computation, and push notifications — using NestJS, PostgreSQL, TypeORM, and Firebase for a multi-asset investment platform.

### Cloud Engineer

*SpringML Inc. (Acquired by Deloitte)*

Remote, Hyderabad · Jul 2022 – Nov 2023

- Built MGIC DocAI, an AI-powered invoice parsing system (Angular, Python/Flask, Vertex AI) that automated structured data extraction across diverse formats, significantly cutting manual review overhead.
- Delivered filterable analytics tables with debounced search for a GCP-hosted vehicle analytics platform; built Looker and Looker Studio dashboards and enforced least-privilege GCP IAM across 4 client projects.

### Software Engineer Intern

*iLink Digital*

Remote · Jan 2022 – Mar 2022

- Built RESTful APIs (Python, Flask, Django) and real-time Grafana dashboards (PostgreSQL, Elasticsearch) for a data-driven analytics platform.

### Software Developer Intern

*Jivrus Technologies*

Remote · May 2021 – Nov 2021

- Developed online assessment proctoring (camera tracking, screen monitoring, secure media storage) and integrated Google Drive and Maps APIs for a scalable EdTech product.

## Education

**B.Tech, Computer Science and Engineering**

*National Institute of Technology (NIT), Andhra Pradesh*

Aug 2018 – Jun 2022

India · NIT is a top-tier government institution (NIRF ranked)
